Journey from **Fresher** > **Professional**

**Kaustubh Kaldate Got Placed at Medpace**

Program Enrolled : CTDA-Excellent Trainee

My journey at KiteL has been truly exciting and amazing. I experienced one of the best learning periods of my life here. The mentors, management team, and every individual associated with KiteL were incredibly helpful and supportive. The training modules included projects that played a significant role in providing hands-on experience with real-world clinical data. These practical experiences greatly enhanced my understanding and skills. Oh, my dear KiteL — thank you for such a memorable and valuable time! I would highly recommend this Clinical Trial Data Analysis (CTDAX) program to anyone who is genuinely looking to build a career in the clinical domain.

**Dewang Kulkarni - B.Pharmacy
Placed at Medpace - Mumbai**

I am sincerely grateful for the opportunities I was given and the knowledge I gained throughout this journey. This traineeship has been instrumental in shaping my career path, and I will always carry the skills and experiences forward with gratitude.

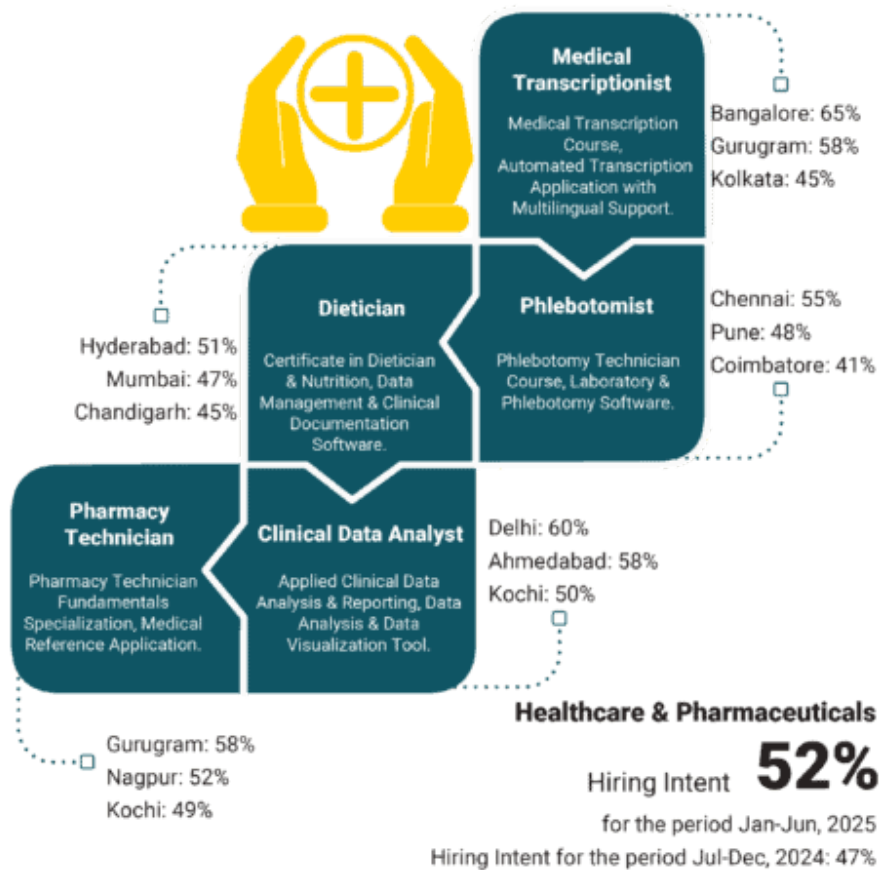

**Suyash Bothe - B.Pharmacy
Placed at Star IT - Mumbai**

My decision to do Clinical trial data analytics after pharmacy was the best professional move I ever made. It has been incredibly valuable and transformative journey. The real-time exposure to clinical scenarios, combined with continuous placement support and structured training, helped me build Clinical Data Analyst Career.

**Sarvesh Kadam - Civil Engg.
Placed at Star IT - Mumbai**

Choosing Clinical Data Analytics after engineering in Civil was a life-changing decision – and I've never looked back!!! Through hands-on projects, real-world case studies, and placement support, KITEL made me industry-ready.

India's aspiring professionals consider pursuing careers in healthcare

Highest Demand for **Medical Transcriptionist** in Bangalore (65%) and **Clinical Data Analyst** in Delhi (60%)

hirings sees surge

EXPRESS HEALTHCARE

Healthcare & Pharmaceuticals

India's healthcare market, valued at **\$372 billion** in 2023, is projected to reach **\$638 billion** by 2025. This rapid growth is fueled by large-scale innovations in hospitals, pharmaceuticals, diagnostics, and expanding healthcare services.

The rise of artificial intelligence in healthcare is driving significant growth, creating new roles for freshers in tech, diagnostics, and innovative healthcare services.

Start Strong in Clinical Research with the Dual Advantage of Drugs & Devices

The healthcare industry is evolving rapidly—and so are the expectations from Clinical Trial Data Analysts. It's no longer enough to know just SAS or basic analytics. Today's professionals need real-world exposure to both drug and medical device studies to stay relevant and competitive.

Skills that recruiters and industry needs

CTDA-Excellent provides a comprehensive platform designed to equip you with the most sought-after skills in Clinical Trial Data Analytics. Through this program, you'll gain in-depth knowledge of Clinical Data Management, Clinical Statistical Programming, and Biostatistics, all of which are highly valued by recruiters and industry leaders.

Work as Junior SAS Programmer for 6 months*

One of the standout benefits of CTDA-Excellent is the opportunity to gain real-world experience. With 6 months of hands-on work as a Junior SAS Programmer, you'll develop practical skills in Clinical Statistical Programming and Data Management. This experience helps bridge the gap between theoretical learning and industry requirements, making you job-ready.

*Subject to meeting qualification criteria

As part of the REAP (Rural Employability Appreciation Program) initiative, over 25 interns from Sarojini College of Pharmacy, Kolhapur, and MMCOP, Pune are currently undergoing their industrial internship with KITEL as part of their academic requirement.

Internship kick-started on 23rd June 2025
